

BASEBETON

A ready to use product of Stone Age

UNIQUE MICROCEMENT

For every surface

Basebeton is seamless and waterproof, making it ideal for bathrooms, kitchens and lavatories. Do you already have a tile wall or floor? No problem. Basebeton can be applied directly over existing tiles. This means that you can quickly create a sleek and hygienic floor or wall without having to do any demolition work. Cleaning is now a piece of cake

Would you like Basebeton in other rooms? That's a good idea. Basebeton comes in many colours, so there is always a tone to match your interior style. Go for Scandinavian light or industrial dark. Pick a neutral natural tone or a lively colour. Plenty of choice. Within three days your house will be like new again.

SYSTEM BUILD UP

A Basebeton finish is built up in several carefully applied layers to ensure strength and durability. After proper substrate preparation and priming, the Basebeton is applied in thin layers by hand, creating its characteristic concrete look. A protective sealer is applied as the final step, providing extra resistance to wear and moisture. The result is a strong, seamless and long-lasting finish.

BASEBETON ORIGINALE

Unique, strong and waterproof
ready-to-use concrete

Unique, extremely strong and watertight ready-to-use concrete Basebeton is available in 64 standard and almost every RAL colour. The concrete plaster can be used in many areas, such as the bathroom, bedroom, kitchen and living room. Suitable for any surface, so that saves a lot of demolition work.

-  Industrial robust concrete look
-  Suitable for underfloor heating
-  Suitable for any surface
-  Available in standard, RAL and NCS colours

BASEBETON PLUS

The convenient one-pot
system of Stone Age

Basebeton Plus, like Basebeton, is a ready-to-use product. Where with the regular Basebeton you apply the first layer of basa and sense layer, here you apply the Basebeton Plus layer twice. A clever one-pot system!

-  One pot for the complete floor
-  Wall and floor
-  Waterproof
-  Same colors as Basebeton Originale

BASEBETON 2K

BASEBETON GRIT

A sustainable concrete plaster floor

Basebeton Grit stands out due to its exceptional wear and scratch resistance. The first layer consists of TechStone 2K. After dust-free preparation, a layer of Basa 2K, reinforced with micronized quartz, is applied. A high-strength coating further enhances the floor's hardness.

BASEBETON SOLID

Our extra-strong floor finish

Basebeton Solid is the harder version of Basebeton. This concrete plaster variant can be applied in the same way as regular Basebeton, only this version is based on epoxy. The only extra thing you have to do is add a comp. B to the Basa.

-  TechStone 2K + Basa 2K
-  Especially for floors
-  Waterproof by itself
-  Available in 20 colours

-  Basa with comp. B
-  Especially for floors
-  Waterproof by itself
-  Available in 22 colours

SEAMLESS CONCRETE LOOK

A seamless concrete look combines durability with timeless design. This decorative concrete finish creates a strong, seamless surface with the authentic appearance of concrete. The subtle texture gives every floor a unique character, making it ideal for both residential and commercial interiors.

The seamless surface is wear-resistant, easy to maintain and suitable for intensive use. This makes Basebeton a reliable and stylish solution for both residential and commercial interiors.

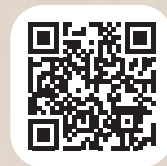

FOR EVERY SURFACE

Experience Basebeton through our sample collection.
